REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs		30	20		50
5. Cats	4	3			3
6. Guinea Pigs		97	16		113
7. Hamsters	20	46			46
8. Rabbits	28	551	371		922
9. Non-Human Primates	203	769	211		980
10. Sheep		3	21		24
11. Pigs	2	113	175		288
12. Other Farm Animals					
Goats			2		2
13. Other Animals					
Bats	187	44	104		148
Ferrets		10			10
Gerbils	80		120		120

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL (Chief Executive Officer or Legally Responsible Institutional official)

ATTACHMENT A

FACILITY LOCATIONS:

1. Department of Comparative Medicine: Health Sciences Building, Harborview Research and Training
2. Center on Human Development and Disability: Bloedel Hall
3. Department of Psychology: Guthrie Hall
4. Regional Primate Research Center: Health Sciences Building, Western Building
5. Department of Zoology: Hitchcock Hall, Kincaid Hall
6. College of Arts and Sciences: Raitt Hall

ATTACHMENT B

Institutional Animal Care and Use Committee Approved Exceptions to the Standards and Regulations of the Animal Welfare Act:

Multiple Major Surgery:

I. Exceptions approved by the University of Washington IACUC and USDA

- A. 1. First craniotomy
2. Second craniotomy, a minimum of 3 months following #1
Species: Non-human primates
Number of animals used: 0
- B. 1. First craniotomy
2. Second craniotomy, a minimum of 3 months following #1
Species: Non-human primates
Number of animals used: 3
- C. 1. First craniotomy
2. Second craniotomy, a minimum of 3 months following #1
Species: Non-human primates
Number of animals used: 1

NOV 26 2003

ATTACHMENT B cont.

II. Exceptions approved by the University of Washington IACUC

- A. 1. Knee surgery
2. A second surgery may be performed 4 weeks after #1 if the first surgical procedure is compromised
Species: Sheep
Number of animals used: 0
- B. 1. Implantation of vascular graft
2. A-V fistula placement, 2 months following #1
Species: Non-human primates
Number of animals used: 0
- C. 1. Implantation of vascular graft, balloon injury to one saphenous artery
2. Injury to other saphenous artery, 2 months following #1
Species: Non-human primates
Number of animals used: 0
- D. 1. Craniotomy and placement of cranial implants
2. Arm surgery to implant muscle and nerve electrodes, a minimum of 7 days following #1.
3. Laminectomy to place cervical vertebral implant to record from neurons in the spinal cord, a minimum of 7 days following #3.
4. Craniotomy, 2 - 8 months after #'s 1 and 2 above (in animals with rejected implants)
5. Laminectomy, 2 - 8 months after #'s 1 and 2 above (in animals with rejected implants)
Species: Non-human primates
Number of animals used: 4
- E. 1. Craniotomy and implantation of cranial chambers
2. Implant wires in arm muscle 4 weeks following #1
3. Craniotomy or laminectomy for tracer injections, a minimum of 4 weeks following #2
4. Craniotomy or laminectomy for tracer injections, a minimum of 2 weeks after #3.
5. Laminectomy to place cervical vertebral implant to record from neurons in the spinal cord, 4 months following a craniotomy for one animal.
Species: Non-human primates
Number of animals used: 1
- F. 1. Pancreatectomy
2. Islet transplantation, 3 weeks after 1a
Species: Non-human primates
Number of animals used: 1
- G. 1. 1st islet transplant
2. 2nd islet transplant, 3 weeks after #1
3. 3rd islet transplant, 3 weeks after #2
Species: Non-human primates
Number of animals used: 0

NOV 26 2003

- H. 1. Thoractomy
2. Islet transplantation 3 weeks after #1
Species: Non-human primates
Number of animals used: 0
- I. 1. Thoractomy
2. Kidney transplant, 3 weeks after #1
Species: Non-human primates
Number of animals used: 0
- J. 1. Laparotomy for oocyte harvest
2. A 2nd lapratomy may be performed for embryo transfer a minimum of 3 weeks after #1.
3. C-section, a minimum of 2.5 months after #2.
Species: Non-human primates
Number of animals used: 0
- K. 1. Partial pancreatectomy and creation of isolated intestinal pouch
2. Laparotomy for islet transplantation, a minimum of 24 hours after #1
Species: Dogs
Number of animals used: 3
- L. 1. Eye coil implantation and head holder
2. Chamber (craniotomy) 2 months after #1
Species: Non-human primates
Number of animals used: 1
- M. 1. Eye coil placement and implantation of stabilization lugs into the skull
2. Craniotomy a minimum of 3 weeks after #1.
Species: Non-human primates
Number of animals used: 0
- N. 1. Placement of TMJ implants and tongue reduction surgery
2. Placement of additional TMJ implants 10 - 14 days after #1.
Species: Pigs
Number of animals used: 0
- O. 1. Placement of TMJ implants (EMG electrodes, x-ray opaque markers)
2. Tongue reduction surgery, 7 - 10 days following #1
3. Placement of additional TMJ implants (strain gauges, transducers), 10 - 14 days following #2.
Species: Pigs
Number of animals used: 0
- P. 1. One surgery to extract teeth and perform osteoplasty
2. Preparation of osteotomy sites and placement of dental implants 9 weeks after #1
Species: Dogs
Number of animals used: 0

- Q. 1. Denudation of aorta with Fogarty embolectomy catheter
2. Catheter surgery to deliver light to activate injected compounds 10 weeks after #1.
Species: Rabbits
Number of animals used: 0
- R. 1. Eye coil and head holder
2. Craniotomy, 6 - 12 months after #1 above
3. Possible chamber repositioning 6 months after craniotomy
4. Possible eye coil replacement 3 - 12 months after initial eye coil surgery
Species: Non-human primates
Number of animals used: 1
- S. 1. Female cats are spayed
2. Craniotomy 2 months after #1
Species: Cats
Number of animals used: 0
- T. 1. Removal of periosteal flap
2. Implantation of explant into reamed glenoid and humeral head replacement 48 hours - 5 days after #1
Species: Rabbits
Number of animals used: 0
- U. 1. Removal of periosteal flap
2. Implantation of periosteal explant 5 - 7 days after #1
Species: Rabbits
Number of animals used: 0
- V. 1. Placement of maternal-fetal catheters (110 days gestation).
2. C-section at 140, 155, and 160 - 165 days gestation, i.e. 30, 45, 50 or 55 days after #1
Species: Non-human primates
Number of animals used: 0
- W. 1. Placement of maternal-fetal catheters (115-120 days gestation)
2. C-section at 160-165 days gestation - i.e., 45-50 days after #1 above
3. Dam to have femoral catheter removed at 6 wks postpartum
Species: Non-human primates
Number of animals used: 0
- X. 1. Placement of maternal-fetal catheters (60 - 70 days gestation)
2. C-section (160 - 165) a minimum of 100 days following #1
Species: Non-human primates
Number of animals used: 0
- Y. 1. Bone marrow aspiration
2. Implantation in the paw of a tissue engineered construct, 3 weeks following #1.
3. Bone ablation and elevation of construct, 6 weeks following #2.
Species: Rabbits
Number of animals used: 0

Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 91-R-0011
2. Number 4103 of animals used in this study.
3. Species (common name) Guinea Pigs of animals used in the study.
4. Explain the procedure producing pain and/or distress.
The temporary pain of intraperitoneal injection.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Guinea pigs are used for the performance of the Food and Drug Administration directed General Safety Test, as defined in 21 CFR Part 610.11. The animals are given an intraperitoneal injection (Part 610.11,c,1) of up to 5mL of a product that is generally regarded as safe and nontoxic. The overt health of the animal is monitored for a seven day period, at which time the test is concluded. Anesthetic analgesic or tranquilizing drugs are not given, as they may interfere with test results. Reactions to the anesthetic might be wrongfully attributed to the test product. In addition, any method used to relieve the pain of an injection would cause further pain and/or distress.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

Agency DHHS-FDA CFR 21 CFR 610.11 General Safety

SEATTLE, WA 98103

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs	0	0	0	0	0
5. Cats	0	0	0	0	0
6. Guinea Pigs	0	0	0	0	0
7. Hamsters	0	0	0	0	0
8. Rabbits	0	0	0	0	0
9. Non-Human Primates	0	0	0	0	0
10. Sheep	0	0	0	0	0
11. Pigs	0	0	0	0	0
12. Other Farm Animals	0	0	0	0	0
13. Other Animals	0	0	0	0	0

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.
